SECTION 3 - HAZARDS IDENTIFICATION

POTENTIAL HEALTH EFFECTS

EYES: Dust may be released when cutting and removing the set bandage, which may enter the eye and cause mechanical irritation

SKIN: No special hazard risk under normal use. If warm water (>25°C) is used to wet the bandage, the setting Plaster of Paris may generate a temperature high enough to cause a burn

INGESTION: Ingestion of Plaster of Paris bandage before being wetted may result in hardening after absorbing moisture from the G.I tract. Plaster hardens when wetted and may result in an obstruction. Large oral doses may result in gastrointestinal disturbances and irritation

INHALATION: Dust may be released when cutting and removing the set bandage which may irritate the mucous membranes of the respiratory tract. Possible nuisance dust effect, sneezing or coughing

SECTION 4 - FIRST AID MEASURES

EYE CONTACT: Flush with copious amounts of water for at least 15 minutes. Assure adequate flushing by separating the eyelids with fingers. If irritation develops, get medical aid

SKIN CONTACT: Wash with soap and water. Get medical attention if irritation develops or persists

INGESTION: Plaster hardens when wetted and ingestion may result in obstruction. Seek immediate medical attention

INHALATION: Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical aid if cough or other symptoms appear

SECTION 5 - FIRE FIGHTING MEASURES

GENERAL INFORMATION

As in any fire, wear a self-contained breathing apparatus in pressure-demand, MSHA/NIOSH (approved or equivalent), and full protective gear.

Combustion generates toxic fumes.

EXTINGUISHING MEDIA

Use water spray, dry chemical, carbon dioxide, or chemical foam.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

GENERAL INFORMATION

Use proper personal protective equipment as indicated in Section 8.

SPILLS/LEAKS

Sweep up and place in suitable containers for recycle or disposal. Remove all ignition sources. Keep away from heat and flame. Avoid breathing dust, vapour, or smoke. Do not let product enter drains.

SECTION 7 - HANDLING AND STORAGE

HANDLING

In accordance with good industrial practice, handle with care and avoid unnecessary personal contact. Wash thoroughly after handling. Use with adequate ventilation. Minimize dust generation and accumulation. Do not puncture or open the pouch unless the product is to be used immediately. Observe good housekeeping and sanitary procedures. Avoid contact with high humidity conditions. Do not eat, drink or smoke while handling the product. Keep away from sources of ignition.

STORAGE

Store in a cool, dry, well-ventilated area. Keep away from heat and high humidity. Protect product from moisture. Exposure to water, including ambient humidity, will result in hardening.

SECTION 8 - EXPOSURE CONTROLS AND PERSONAL PROTECTION

ENGINEERING CONTROLS

Ensure adequate wetting of the bandage, in water at 20-25°C, in accordance with the instructions for applying the bandage (see the instructions provided with the product). Where set bandages are removed by cutting, ensure good dilution ventilation. Take action to control dust levels being generated. Consider tools with local exhaust extraction built in.

INDIVIDUAL PROTECTION FOR INDUSTRIAL USE

- EYES:** Wear safety glasses with side shields or safety goggles
- SKIN:** Wear impervious gloves
- CLOTHING:** Choose body protection according to the amount and concentration of the dangerous substance at the work place
- RESPIRATORS:** Follow the OSHA respirator regulations found in 29 CFR 1910.134 or European Standard EN 149. Use a NIOSH/MSHA or European Standard EN 149 approved respirator if exposure limits are exceeded or if irritation or other symptoms are experienced
